de la Personne
International Group

76th INTERNATIONAL MEETING IN ISSENHEIM

(Alsace, France)

26th / 29th July
to 1st August 2026

How does Medicine of the whole person fit in a digital world?

Medicine of the Person or medicine as relationship between the doctor and their patient, seeks to look beyond the symptoms and the course of the patient's illness and to better understand what the patient's suffering means to them. The personal relationship between patient and doctor is crucial to this.

To what extent do social media, the enormous amount of data on the internet and artificial intelligence help or hinder this relationship?

Where does digital life help to create a better, more healing encounter, where does it interfere, and where can it even make both doctor and patient ill?

We will discuss such questions with experts from different countries and healthcare systems and see how we can find a personal way through with our patients today.

A conference for doctors and their partners, as well as nursing and therapy professionals who also want to walk alongside their patients.

Registration form on our website [Home - Medicine of the Person](#)

The full programme will be published on this website in a few months time.

Congress languages

German, French and English

- The presentations will be given written in all three languages.
- Multilingual discussions will be translated ad hoc.
